

Ponovno oblikovanje spletnega uporabniškega vmesnika za **FRI** urnik

Skupina 6: **Miha Ciglar, Matevž Crček, Luka Gulič in Miha Lazić**

Komunikacija človek-računalnik,
Fakulteta za računalništvo in informatiko,
Univerza v Ljubljani,
2025/26

Metodologija

1

Pridobivanje informacij

Analiza uporabnikov z definiranjem dveh *person* (študenta in profesorja) in njihov *journey map*.

2

Papirnati prototip

Začetni koncepti mobilnega in desktop vmesnika aplikacije narisani s svinčnikom na papir.

3

Pridobivanje informacij

Mnenje asistenta in analiza obstoječih rešitev (*Google Calendar*, *eAsistent*), ki že delujejo.

4

Figma prototip

Izdelava dva pogleda mobilnega in desktop vmesnika v *Figma* (študent in profesor) v *FRI CGP* barvah.

5

Pridobivanje informacij

Mnenja asistenta in študentov ter dodatna analiza uporabniških zahtev preko ankete.

6

Končna verzija vmesnika

Izpopolnjevanje prejšnje različice glede na rezultate ankete in odpravljanje manjših nekonsistentnosti.

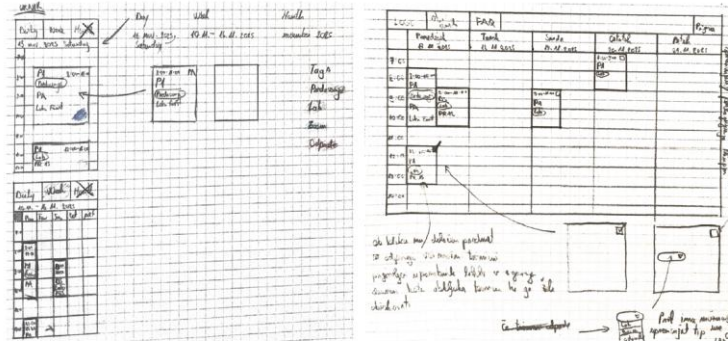

Figure 2: Paper prototypes showing early concepts, with the mobile version on the left and the desktop on the right.

Figure 4: Comparison of the previous global edit-mode interaction (left) with the simplified contextual activity status management integrated into the professor's weekly view in the final design (right).

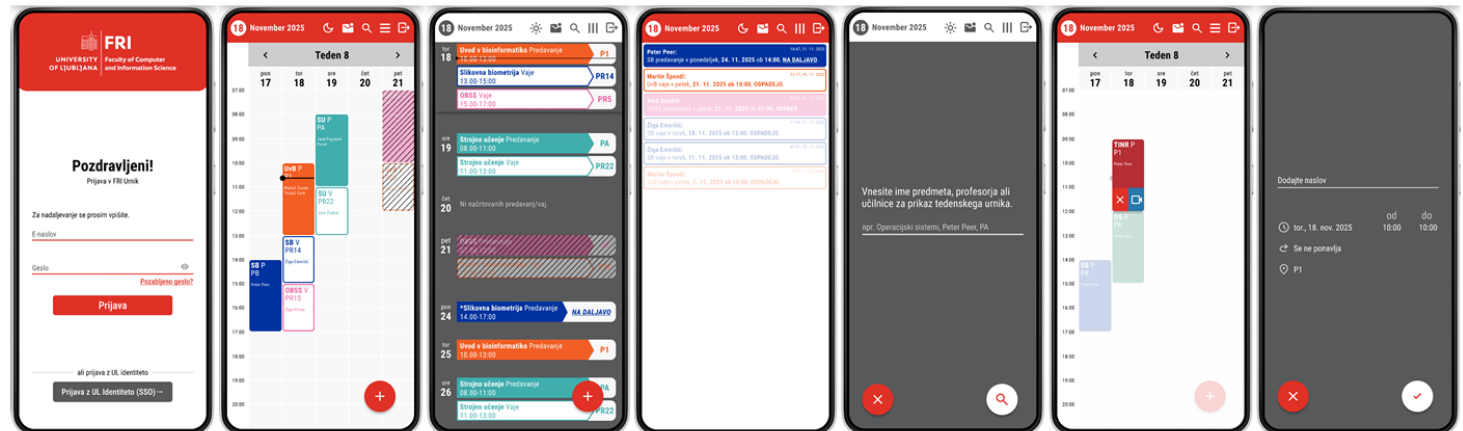

Figure 1: Selected design frames of the redesigned FRI Urnik, illustrating key layout concepts for mobile view.

Analiza uporabnikov: **persona, journey map**

Table 1: User journey map illustrating key stages of using current FRI Urnik application.

Študent, ki ima veliko predmetov, kjer vsak predmet sestavljajo predavanja in več ciklov vaj, potrebuje hitro in pregledno vizualizacijo urnika z možnostjo personaliziranja in obveščanja o spremembah, ker si želi minimizirati čas organizacije dejanskega študija v pestrem študentskem življenju.

Profesor, ki vodi več predmetov in hkrati upravlja številne cikle vaj ter predavanj, potrebuje enostaven, hiter in centraliziran vmesnik za posodabljanje urnika ter obveščanje študentov, ker želi zmanjšati administrativno obremenitev in zagotoviti, da so študenti pravočasno in zanesljivo informirani o vseh spremembah, hkrati pa imeti personaliziran pogled.

Stage	Actions	Touchpoints	Emotions	Pain Points	Opportunities
Beginning of the academic year	The student/professor manually creates a schedule according to personal preferences.	FRI scheduling web application (mobile).	Distraction, lack of organization.	A significant amount of time is spent comparing different lab groups, lectures, and other events in order to create an optimal schedule.	Visualization of all available labs and schedule personalization (adding events).
Schedule review	The student/professor repeatedly checks what, where, and when the next scheduled activity takes place.	FRI scheduling web application (mobile).	Uncertainty, confusion.	Too many interactions are required to access the desired information.	Quick overview of the next scheduled activity.
Schedule change	The student receives an email notification about changes to lectures or labs from the professor.	Outlook.	Panic, frustration, anger.	The student does not see the notification in time or does not receive it at all. The professor must manually notify students about changes via email.	In-app notification review, event status updates in the schedule, and automated notifications to students.

Analiza uporabnikov: anketa

- **40 anketirancev** (75% študenti, 15% profesorji, 10% asistenti).
- 70% uporablja FRI Urnik **nekajkrat na teden**.
- 92.5% udeležencev uporablja FRI Urnik za **pregled dnevnih predavaj/vaj**.
- 67.5% dostopajo do FRI Urnika preko **mobilnih naprav**.
- **Srednje-nizko zadovoljstvo** trenutne različice FRI Urnika zaradi:
 - *Slabe prilagodljivosti mobilnim napravam,*
 - *Pomanjkanja jasnosti,*
 - *Pomanjkanje dodatnih funkcionalnosti,*
 - *Težko sledenje spremembam.*
- **Najbolj željene funkcionalnosti** med anketiranci:
 - *Barvno ločevanje tipov dogodkov (55%),*
 - *Barvno ločevanje predmetov (52.5%),*
 - *Filtriranje po predmetu (45%),*
 - *Obvestila o spremembah (45%),*
 - *Temni način (45%),*
 - *Prikaz samo lastnih predmetov (45%),*
 - *Minimalistični dizajn (42.5%),*
 - *Izvoz v Google Calendar (40%),*
 - *Dnveni, tedenski in mesečni pogled (37.5%).*

Table 3: Overview of Survey Results for the FRI Scheduling System (N=40)

Survey Question	Response Options	Percentage (%)
User role	Students	75.0
	Professors	15.0
	Teaching assistants	10.0
Frequency of use	Several times per week	70.0
	Multiple times per week	15.0
	Very rarely	15.0
Primary use of the schedule	Review of daily lectures/exercises	92.5
	Searching for non-assigned courses	42.5
	Long-term planning	32.5
	Searching for free classrooms	30.0
Primary access device	Mobile phone	67.5
	Desktop or laptop computer	32.5
Overall satisfaction (1–5)	1 (Very dissatisfied)	5.0
	2	40.0
	3	37.5
	4	17.5
	5 (Very satisfied)	0.0
Layout clarity (1–5)	1 (Very unclear)	15.0
	2	25.0
	3	45.0
	4	12.5
	5 (Very clear)	2.5
Ease of finding information (1–5)	1 (Very difficult)	7.5
	2	25.0
	3	37.5
	4	17.5
	5 (Very easy)	12.5
Reported problems	Poor mobile adaptation	75.0
	Lack of clarity	62.5
	Limited functionality	52.5
	Difficulty tracking changes	45.0
	Non-intuitive interaction	27.5
	Information overload	20.0
Desired features (top selections)	Color-coding of event types	55.0
	Color-coding of courses	52.5
	Filtering by course	45.0
	Notifications about changes	45.0
	Dark mode	45.0
	Showing only my courses	45.0
	Minimalistic design	42.5
	Export to Google Calendar	40.0
	Daily, weekly, and monthly views	37.5

Končna **mobile** verzija

- 2 minimalistična vmesnika **Študent** in **Profesor**,
- Novo prijavno okno s prijavo preko šolskega računa ali digitalne identitete,
- 2 pogleda **Teden** in **Razpored**,
- Skok na trenutno aktivnost,
- Zavihek *Obvestila o spremembah v urniku*,
- Zavihek *Iskanje drugih urnikov*,
- Dodajanje lastnih dogodkov,
- Vizualizacija vseh terminov vaj predmeta na urniku (za Študenta),
- Spreminjanje statusa aktivnosti (za Profesorja),
- Temni način.

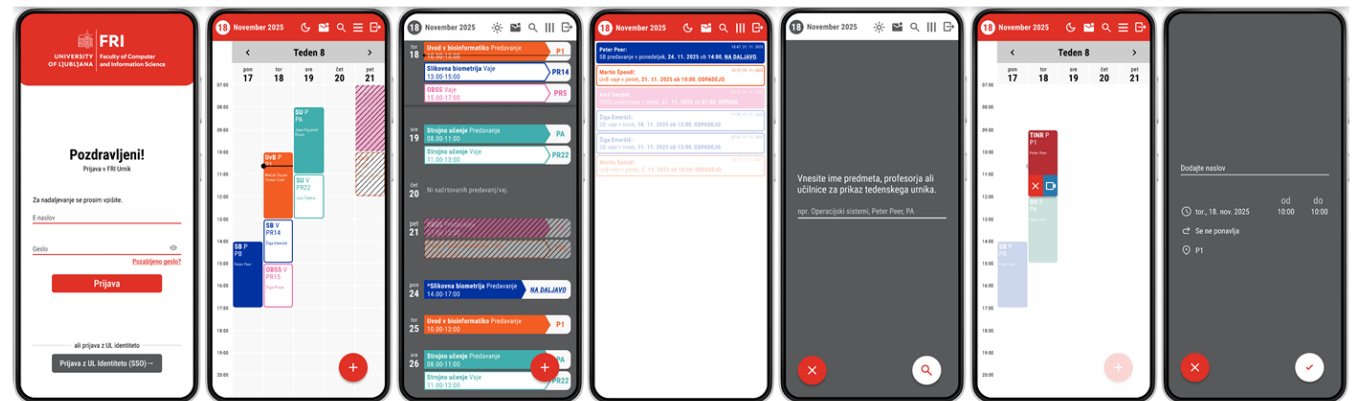

Figure 1: Selected design frames of the redesigned FRI Urnik, illustrating key layout concepts for mobile view.

Končna **desktop** verzija

- 2 enostavna vmesnika **Študent** in **Profesor**,
- Novo prijavno okno s prijavo preko šolskega računa ali digitalne identitete,
- 2 pogleda **Teden** in **Razpored**,
- Skok na trenutno aktivnost,
- Zavihek *Obvestila o spremembah v urniku*,
- Zavihek *Iskanje drugih urnikov*,
- Dodajanje lastnih dogodkov,
- Vizualizacija vseh terminov vaj predmeta na urniku (za Študenta),
- Spreminjanje statusa aktivnosti (za Profesora),
- Temni način.
